

# BEST OF BOSTON HOME™

Awarded by **Boston** magazine

## 2014

### WHY WE LOVE IT

*Built for a couple with grown children, this mudroom, which also serves as a back entry and garage connector, offers the perfect landing spot for busy people. The room's built-in bench, long countertop, auxiliary gardening sink, and stone floor are practical and elegantly executed, and the wall of floor-to-ceiling cupboards (not shown) add to the room's functionality. The rustic light fixtures drove the copper, caramel, and brown hues throughout the home. Natural and painted beadboard walls and ceilings echo the New England cottage aesthetic.*
